

www.Verisign.com

Certification Date: January 29, 2007

VeriSign, the leading provider of security and infrastructure services headquartered in Mountain View, California, conducted an assessment for Bidx.com, Inc., an Info Tech company and is pleased to verify that the Bid Express Service, its supporting infrastructure, and the governing policies, processes, and procedures has been certified under the VeriSign® Security Certification Program.

The scope of our assessment was the Bid Express Service infrastructure, facilities, and the policies, procedures, and processes used to operate and manage the enterprise security program. Our assessment included a detailed review of:

- The network architecture
- The policies and processes used to manage the infrastructure and personnel
- The results of recurring vulnerability testing of the critical systems
- Critical device configurations

Our assessment was conducted in accordance with VeriSign's Security Certification Methodology, which incorporates openly available requirements from regulations and industry standards. For the assessment, VeriSign focused on the security components of the following standards:

- ISO 17799:2005
- OWASP Top 10
- FTC GLBA Consumer Privacy Notice

In our opinion, as of the Certification Date above, Bidx.com, Inc., an Info Tech company has met the requirements of the VeriSign Security Certification Program with respect to its Bid Express Service networks, systems and supporting security policies and procedures. As such, Bidx.com, Inc., an Info Tech company has demonstrated that, as of the Certification Date, it has taken reasonable and appropriate steps to (i) identify and manage information security risks relating to the enterprise, and (ii) utilize information security best practices in the area(s) assessed.

Respectfully submitted,

VeriSign Security Services
